Private Suites For Your Critical IT

SECURITY

Security is multi-layered throughout the site, from the hardened shell to access control systems, surveillance systems, and security personnel

COMPLIANCE

Extensive compliance auditing strengthens your regulatory process: ISO/IEC 27001:2013, HIPPA, PCI, SOC 1, SOC 2

CONTROL

Customizable access controls gives you all the autonomy of your private space without the significant capital expense of building your own data center

PERFORMANCE

Our state-of-the art Chicago One facility is equipped with brand new precision cooling and distributed redundant infrastructure.

EXPERT SUPPORT

Extend your team of experts with access to Element Critical engineers and implement 24/7 remote hands monitoring and support when needed

CONNECTIVITY

Expand your modern network connectivity with our diverse carrier-neutral ecosystem and cloud connect on-ramps to cloud providers
